

Wall systems

Colonne terra soffitto

A modular system that interprets verticality as a compositional and functional element. The floor-to-ceiling tall units extend in height up to 300 cm, drawing light and contemporary geometries that mark the room with elegance and precision. Available in two structural variants, they can be anchored to the wall or placed in the center of the room, thus becoming the protagonists of the space or an integral part of the architectural decor.

EQUIPPED FLOOR-TO-CEILING TALL UNITS

Their versatility is expressed through four interior configurations designed to meet different needs of use and style. With glass shelves, for light and transparent compositions that enhance luminosity. With wooden shelves, for a warm, textural aesthetic that dialogues with other furniture elements. With shoe shelves, functional and discreet, ideal for entrance areas or with the equipped configuration, which combines wooden shelves, coat racks and shoe shelves, creating a complete, tidy and refined solution.

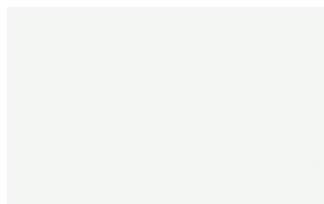

FINISHES

Imagine your floor-to-ceiling tall units in freedom: a versatile system that adapts to the size of the space and the finishes you prefer. Discover them all now.
